

CITY OF EDMONDS

CLIMATE ACTION PLAN

The City of Edmonds is developing a new Climate Action Plan (CAP) that will help reduce greenhouse gas emissions and achieve climate goals with community solutions and individual actions. The goal of the CAP is to be carbon neutral by 2050.

Proposed Solutions: Transportation

The City of Edmonds is proposing the following strategies to be included in the new Climate Action Plan to address sources of emissions from the transportation sector.

➤ **Reduce vehicle miles traveled (VMT) through more sustainable land use patterns (transit-oriented development, local efficiency).**

- Support mixed-use development in neighborhood commercial centers to encourage close-to-home local shopping and employment opportunities.

➤ **Reduce vehicle miles traveled (VMT) by improving transit systems.**

- Coordinate with Community Transit, Sound Transit, and WSDOT to pursue funding opportunities to increase transit service and improve convenience to encourage greater ridership.

➤ **Reduce vehicle miles traveled (VMT) by promoting active transportation.**

- Increase bicycle parking and lanes/trails that connect commercial and mobility hubs in concert with the City's transportation plan.

➤ **Promote carpooling and vehicle sharing. Promote and facilitate, where necessary, shared vehicles used, such as school carpooling and vehicle-on-demand parking spaces.**

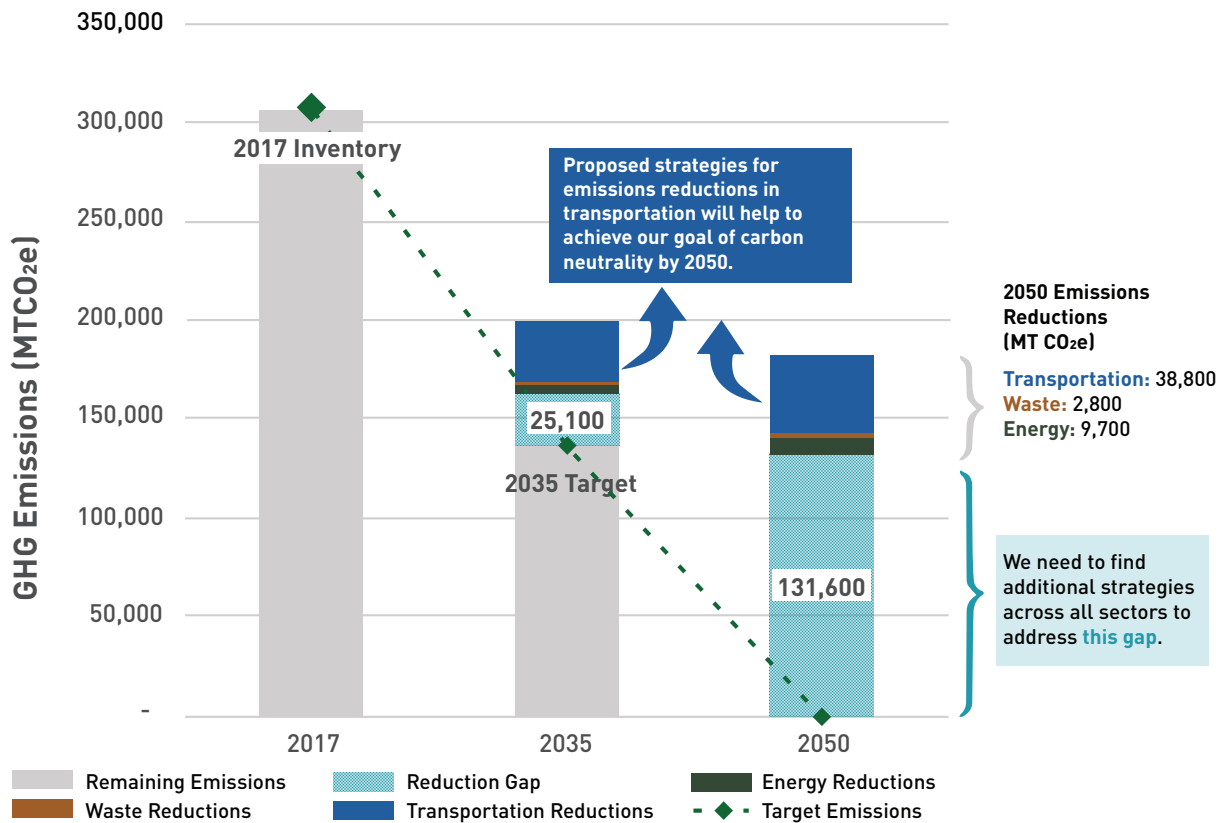

➤ **Promote electric vehicles and other low-carbon vehicles.**

- Work with local vehicle dealers to further promote hybrid/electric vehicles within the community.

Target and Planned Reductions (2017, 2035, 2050)
